

Jericho Guiang

Skokie, IL • 708-941-9478 • guiangjericho2@gmail.com • [Github](#) • [LinkedIn](#)

EDUCATION

DePaul University, College of Computing and Digital Media

Chicago, IL

Bachelor of Science in Computer Science (Concentration: Software Development)

Dean's List - Spring 2024, Autumn 2025

Relevant coursework: Algorithms, Data Structures, Distributed Systems, Database Systems, Software Testing, Compiler Design, Computer Systems

Technical Interests: Backend Engineering, AI Applications, Software Testing, Distributed Systems, Cloud Technologies

PROJECTS

AI Oral Exam Grader | [Github](#)

- Led development of the teacher-facing dashboard, implementing SPA-style navigation, exam management workflows, responsive sidebar behavior, notifications, and student-management interfaces.
- Redesigned authentication and signup interfaces using the BlueVox design system and improved navigation, usability, and consistency across teacher-facing workflows.
- Contributed to integration and testing of a FastAPI/Jinja2 application using SQLAlchemy, Pydantic, and Together.ai for AI-generated exam questions and automated response grading.
- Debugged and delivered exam editing, reopening, enable/disable controls, notification management, and UI stability improvements through Git-based team development.
- Collaborated with an 8-person Agile capstone team to ship a production-ready application for instructors and students.

Technologies: Python, FastAPI, SQLAlchemy, PostgreSQL, Together.ai API, Pydantic, Jinja2

Enterprise Knowledge Management Platform | [Github](#)

- Built an enterprise-grade Retrieval-Augmented Generation (RAG) platform enabling semantic search and grounded AI-powered question answering across internal documents.
- Developed a document-ingestion pipeline supporting PDF, DOCX, and TXT files, implementing text extraction, chunking, embedding generation, pgvector similarity search, HNSW indexing, and grounded Retrieval-Augmented Generation with structured citations.
- Designed 25 RESTful API endpoints supporting authentication, document management, semantic search, conversations, analytics, and administrative workflows, while establishing Docker- and GitHub Actions-based CI pipelines with 130 automated tests.

Technologies: Python, FastAPI, SQLAlchemy, React, TypeScript, PostgreSQL, pgvector, Docker, Together.ai, GitHub Actions

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, C, C++, R

Frameworks & Technologies: React, FastAPI, Node.js, Express, Jinja2, SQLAlchemy, REST APIs, Pydantic

Databases: PostgreSQL, MongoDB, MySQL, pgvector, DB2

Cloud & DevOps: AWS, Docker, Git, GitHub Actions, Linux, Kafka

Testing: JUnit, Maven, Playwright, JaCoCo, Checkstyle, Spoon

Certifications

- AWS Certified Cloud Practitioner (2024)
- LFD103 Linux Kernel Development - The Linux Foundation (2024)
- IBM Z Xplore - Concepts (2025)
- IBM Z Xplore - Advanced (2026)
